

New Chip PC Product Offers Flexibility, Manageability and Superb Performance

Chip PC Technologies, a global technology leader in thin client and virtual desktop solutions has released its new powerful, compact, Windows Embedded Standard 2009 thin-client – the **EX-PC XPD4741**.

The XPD4741 is specifically designed for server-based and desktop virtualisation environments, supporting PXE boot, multi DVI LCD displays and optional internal wireless solution.

The fully managed device with low power consumption and small footprint is ideal for users seeking to reduce the running costs of their infrastructures, yet require high-end functionality, such as multiple displays and demanding applications.

"We put special effort in offering an intelligent management to the XPD4741, as part of our advanced portfolio of thin client solutions, covering CE and Linux-based devices as well" commented Adi Dulberg, Chip PC CEO.

The **Chip PC Xcalibur Global XP Client** enables complete policy-based, remote management of the XPD4741 from a central location, including inventory status, session management and integration with Active Directory. It also offers device configuration management based on users & groups policies.

Additional tools to manage the XPD4741 the Altiris Deployment Solution and Microsoft WDS (Windows Deployment Server), enabling remote deployment and updates of clients from a central location.

The XPD4741 is now available from Prolinx. If you would like to discover the benefits of Virtual Desktop Infrastructure, The Prolinx **Virtual Desktop Infrastructure Assessment** service provides a structured process to define the correct strategy for your organisation.
