

VMware Lab Manager Jumpstart

Supporting your virtualised IT environment

Overview

This on-site consulting engagement is designed for development organisations that want to optimise their software development and test infrastructure by speeding up cycle times, cutting costs and increasing the quality of delivered software systems.

This proof-of-concept installation will help you get started quickly and leverage the capabilities of VMware Lab Manager.

Target Audience

- IT administrators responsible for setup and maintenance of VMware Lab Manager
- Quality Assurance and System Engineers who are responsible for test builds and test administration

Deliverables

- Standard on-site installation of VMware Lab Manager using VMware Infrastructure 3 (up to two VMware ESX hosts)
- Interactive proof-of-concept workshop focusing on use, administration and operations
- Best practices and knowledge transfer, along with a guided tour of an on-site installation

Benefits

- Accelerate your VMware Lab Manager implementation
- Mitigate risk by leveraging experienced consultants and proven best practices
- Provide a proof-of-concept in your environment

Roles and Responsibilities

- Certified Professional Consultant: Conducts workshop, including installation, and best practices knowledge for configuration, administration and ongoing management
- Customer Project Manager: Responsible for coordinating jumpstart-related IT functions
- Customer System Administrators: Responsible for server hardware, storage, networking, operating system, and applications management

Requirements

- VMware Lab Manager and ESX 3.x host
- Hardware compatible with VMware Lab Manager
- Conference room with projector and networked desktops/laptops running MS Windows 2000 or higher

Scope and Pricing

- Up to 2 days on-site
- Maximum of 5 participants
- VMware Lab Manager Jumpstart will be delivered by a VMware Certified Professional (VCP) consultant
- Contact your Prolinx account manager or call 01844 279199 for pricing
