

VMware Infrastructure Upgrade Workshop

Supporting your virtualised IT environment

Overview

This consulting engagement provides best practice scenarios to upgrade from VMware ESX Server 2.x or 3.x and optionally from VMware Virtual Center Management Server 1.x or 2.x, to VMware vSphere and vCenter 4.0 respectively.

The workshop provides an understanding of the resources and steps required to determine the upgrade path best suited to your environment.

Target Audience

VMware systems administrators or operators who are planning to upgrade their environment within 90 days.

Deliverables

- On-site upgrade using your own supported server hardware for up to two (2) non-production VMware ESX server 2.x or 3.x nodes and one (1) Virtual Center 1.x or 2.x Management Agent
- Configuration analysis report based on the Virtual Infrastructure Audit toolkit
- Upgrade best practices knowledge transfer

Benefits

- Accelerate your upgrade process to VMware vSphere and vCenter 4.0
- Mitigate risk by leveraging experienced consultants and proven best practices
- Provide an upgrade workshop in your environment

Roles & Responsibilities

- VMware Certified Professional Consultant: Responsible for the pre-upgrade analysis (off-site) and implementation, migration, virtual machine upgrades, and knowledge transfer (on-site)
- Customer VMware Administrator/Operator: Responsible for preparation of test environment, providing necessary log files, and participating in knowledge transfer and activities

Requirements

- Existing VMware ESX Server 2.x or 3.x and VMware VirtualCenter 1.x or 2.x test environment installed on supported server hardware
- Supported VMware vSphere test environment
