

# VMware ThinApp Application Virtualisation Jumpstart

## Supporting your virtualised IT environment

### Overview

IT groups responsible for supporting end-users and who want to improve management of desktop resources will be interested in this VMware ThinApp Application Virtualisation Jumpstart.

IT organisations can now loosely couple the OS with virtualised desktop applications, which provides greater flexibility and manageability of these resources.

Through application virtualisation, organisations can easily package and deploy complex end-user software without application conflicts.

### Deliverables

- On-site installation of two copies of ThinApp Capture software
- One interactive workshop on ThinApp technology covering application packaging best practices, application deployment and management process
- Knowledge transfer on guidelines and best practices for integrating ThinApp into your existing infrastructure

### Benefits

- Reduce time to application deployment without cumbersome infrastructure
- Deploy applications to the latest OS without application conflicts
- Understand application packaging best practices and troubleshooting

### Target Audience

- Companies who want to reduce IT costs for administering desktop resources while maintaining end-user satisfaction, system availability and performance
- Customers already familiar with virtualisation, and want to deliver virtual applications to end-users will be interested in this workshop

### Roles and Responsibilities

- Prolinx VCP - Setup and configuration of ThinApp environment, conduct workshop, knowledge transfer of ThinApp, packaging and guidelines for infrastructure integration
- Customer Project Manager - Responsible for planning and coordinating IT functions and engagement logistics
- Customer Desktop and Application Support - Responsible for application deployment and management

### Requirements

- Supported ThinApp Application Capturing workstations (VMware Workstation 5.5 or higher)
- Three sample applications, with installation media and licenses, for application virtualisation demonstration
- Conference room with projector and network-connected desktops/laptops running Windows XP operating system

### Scope and Pricing

- Up to 2 days on-site
- Maximum of 5 participants
- Up to 2 ThinApp Capture workstations and 3 packaged applications
- Service is delivered by a VMware Certified Professional (VCP)
- Contact your Prolinx account manager or call 01844 279199 for pricing
