

# Arbitus Deal Management System

## Creating a Collaborative Knowledge Base

### Arbitus

Arbitus is a web-based software platform specifically designed for Corporate Finance organisations. Developed and hosted by Prolinx, Arbitus provides a systematic framework to manage clients and fulfil regulatory processes when managing mergers, acquisitions and other aspects of business funding.

Implementing Arbitus allows organisations to grow their knowledge base and promote cross-selling collaboration. The solution also allows Corporate Finance organisations to significantly improve their level of customer service and regulatory record keeping while at the same time increasing team productivity and efficiency.

Valuable intelligence developed through routine activities can be captured and recorded within the Arbitus system. This expanding knowledge base can be easily utilised within future projects and initiatives, offering significant competitive advantage and empowering colleagues through knowledge sharing.

### Benefits

- Gain comprehensive control of information and increase strategic thinking time
- Reduce the cost of acquiring new mandates
- Reduce pitch preparation time
- Streamline administration procedure
- Integrate regulatory documentation with client handling
- Reduced administration burden
- Produce a comprehensive, easily accessible audit trail
- Concurrently manage a greater number of opportunities
- Increase opportunity to mandate ratio
- Justify success fee contingencies

### Licensing and Support

Arbitus Licensing and support is available as part of a three or five-year package. Packages include full installation, remote hosting, individual user access ID setup, online user documentation, free upgrades to new versions of Arbitus and on-line technical support between the hours of 9.00am to 5.30pm, Monday to Friday.

License fees are paid annually at the beginning of the license year and additional users can be added at any point, chargeable on a pro-rata basis.
