

# Site Recovery Manager Jumpstart

## Supporting your virtualised IT environment

### Overview

VMware Site Recovery Manager (SRM) automates the execution of disaster recovery plans for the virtual environment, reducing your time to recover and minimising the possibility of human errors during the recovery process.

The SRM Jumpstart provides you with a proof-of-concept, on-site installation and configuration of SRM. You will also learn how to prepare an effective disaster recovery plan and configure SRM to execute the plan for you if an outage occurs.

As part of this engagement, a VMware Certified Professional (VCP) consultant will install and configure SRM in your environment, and create and execute a sample recovery plan.

### Target Audience

Customers experienced with VMware Infrastructure who want to implement VMware SRM for disaster recovery.

### Deliverables

- On-site installation of customer's licensed copy of SRM to represent two sites: one primary and one recovery
- Proof-of-concept setup at one location only
- Interactive workshop focusing on disaster recovery planning using SRM, and SRM architecture, administration and operations
- Sharing of best practices for using Site Recovery Manager

### Benefits

- Shorten time to recover and minimize human error when outages occur
- Mitigate risk by leveraging experienced consultants and understanding proven best practices
- Accelerate staff learning for optimized implementation

### Requirements

- Two ESX™ hosts (Ver. 3.0.2 or higher) representing primary and recovery sites
- Two VirtualCenter Servers (Ver. 2.5 or higher) representing primary and recovery site, each managing an ESX host
- Two SRM Servers (can be same as VirtualCenter Server) representing primary and recovery sites
- Separate Site Recovery Manager database and VirtualCenter database for primary and recovery sites
- Site Recovery Manager-compatible shared Fibre Channel or iSCSI storage area network configured with replication between the primary and recovery sites
- Sample virtual machines on ESX host at primary site
- Conference room with projector and networked desktops/laptops running MS Windows® 2000 or higher

### Roles & Responsibilities

- VMware Certified Professional (VCP) Consultant: Implements environment, conducts workshop, provides best practices on configuration, administration and infrastructure management
- Customer Project Manager: Plans and coordinates all IT functions for Jumpstart delivery
- Customer Systems Administrator: Responsible for server hardware, storage and networking
- Customer Server Administrator: Responsible for operating system and applications

### Scope and Pricing

- Up to three (3) days on-site
- Maximum of five (5) participants
- Delivered by a VMware Certified Professional (VCP) consultant
- Contact your Prolinx account manager or call 01844 279199 for pricing
