

Storage Management Consultancy

Supporting your Storage Infrastructure and Data Management Strategy

Overview

In many organisations the volume of data is far outpacing storage capacity. As a result, IT departments are increasingly burdened with mounting storage management duties, longer backup windows and rising storage costs. Analysts estimate that for every £1 spent acquiring storage capacity as much as £5 is spent managing it, with up to 80% of data remaining inactive in production systems – Meta Group.

Prolinx provides business and technology expertise, proven processes, and leading solutions across the key areas of data and storage management. Our service offerings help enterprises optimise storage infrastructure by improving efficiency and service delivery while managing technology and business risks.

Prolinx Consultants offer the breadth and depth of expertise many organisations need to define, design, and implement comprehensive storage management strategies. Effective strategies will allow organisations to efficiently and appropriately store, manage and discover critical business information as it is created, stored and eventually becomes obsolete.

Services

- **Assess:** Prolinx experts assess the effectiveness of the client's current storage environment, including people, processes and technology.
- **Design:** Prolinx experts create a storage solution architecture design based upon the client's business objectives, requirements, and service level agreements (SLAs).
- **Transform:** Prolinx experts develop, test and deploy solutions that may include technologies from industry leading vendors.
- **Operate:** Prolinx experts provide documentation, transfer knowledge, and offer proactive maintenance as well as onsite resident consultants for ongoing management of the storage solution.

Target Audience

Companies planning to implement a comprehensive storage management strategy who need guidance on best practice, process, technical requirements and justification of expenditure.

Benefits

- Define the gap between best practices and the current environment to identify areas for improvement.
- Regain control of your storage infrastructure using best practices and leveraging industry-leading technologies
- Optimise storage infrastructure and improve efficiency
