

Exchange Deployment Planning Service

Maximising your messaging investment

Overview

The Exchange Deployment Planning Service (EDPS) is designed to provide customers with the processes, tools, knowledge and support to realise the benefits of a more efficient infrastructure by deploying Microsoft Exchange Server 2010.

The engagement enables customers to be exposed rapidly to standard Microsoft Exchange Server 2010 Architecture and deployment planning methodology, optimising the effectiveness of deployment and easing concerns around the cost and complexity involved.

Target Audience

Customers interested in the features and functionality of Microsoft Exchange 2010 and require an introduction on potential deployment strategies for their organisation.

Deliverables

- Strategy Briefing Engagement Questionnaire to understand environment and establish expectations
- EDPS engagement summary and recommendations documentation covering business requirements, current environment, technical requirements and operational requirements
- EDPS Delivery Evaluation Form (optional) to provide valuable data for follow up work and to allow optimisation of delivery style

Benefits

- Leverage of an Exchange 2010 expert for comprehensive introduction to Exchange Server 2010
- Understanding of basic new functionality provided by Exchange 2010

Action	Responsibility
Engagement kick off	All
Exchange Server 2010 business value	Consultant
Customer Network Infrastructure	Consultant
Exchange Server 2010 Q&A session	All
Preparation of the recommendation documentation	Consultant
