

Exchange Deployment Planning Service: 3 and 5-day engagements

Maximising your messaging investment

Overview

The Exchange Deployment Planning Service (EDPS) is designed to provide customers with the processes, tools, knowledge and support to optimise the effectiveness and ease concerns around the cost and complexity of deploying Microsoft Exchange Server 2010.

Customers will be exposed to standard Microsoft Exchange Server 2010 Architecture and deployment planning methodology via strategy and planning workshops, with the option to extend the service to include access to Microsoft lab, used demonstrate product functionality and execution of customer scenarios, such as transitioning users from Exchange 2003 or 2007 to Exchange 2010.

Deliverables

- EDPS summary and plan detailing customer specifics, challenges, recommendations and providing a roadmap for deployment
- EDPS delivery evaluation form (optional) to provide data for follow up work and to allow optimisation of delivery style
- Exchange Server 2010 Lab: Providing a pre-packaged and customised virtual environment. Deployment will include two virtual machines, and Active Directory Domain Controller with Exchange Server 2003/2007 and an Exchange Server 2010 (5 day engagement only).

Target Audience

Technical and business decision makers requiring an introduction to the features, and functionality of Microsoft Exchange 2010 and potential deployment strategies.

Benefits

- The opportunity to leverage an Exchange 2010 expert for their deployment planning activities
- Understanding of architectural and operational aspects of Exchange 2010
- A defined path for their Exchange 2010 deployment

Requirements

- Projector to present the slide decks either from the consultant's laptop or from their own machine (can be supplied)
- Meeting room adequate for the presentation
- Internet access for remote access to the Exchange 2010 Server labs

Action	Owner
Kick off meeting, customer goals/deployment challenges	All
Exchange Server 2010 features and benefits	Consultant
Architecture and planning	Consultant
Deployment, operations management and security	Consultant
Virtual Lab intro/customisation (5 day)	All
Lab scenarios (5 day)	Consultant
